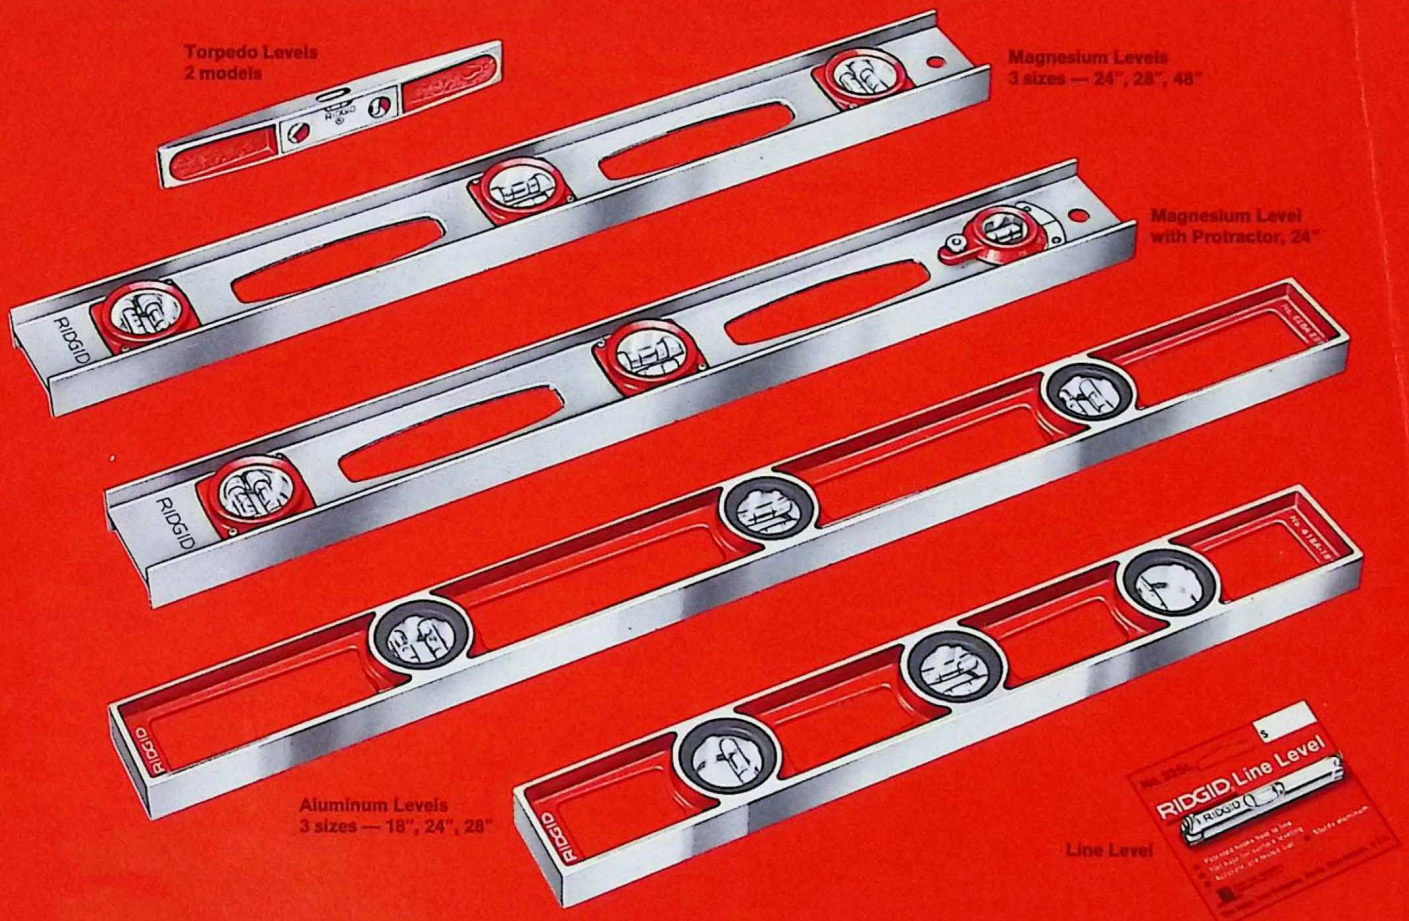
Special RIDGID Catalog Sheet No. 70-A
Effective January 19, 1970

New! RIDGID® Levels



Complete Line of Aluminum, Magnesium, Torpedo, and Line Levels

Aluminum Levels: Rust and warp-proof cast aluminum and milled to close tolerances for accurate leveling. Vials are matched for professional accuracy, and are locked in a durable truss-constructed body. Yellow fluid increases visibility. Protective glass covers are set into shock-absorbing rubber, and are easily removed for cleaning or replacement.

Magnesium Levels: Stronger, yet 1/3 lighter than aluminum. I-beam construction, practically unbreakable, with large, smooth hand holes and handy hang-up hole for ease of use. Precision milled for complete accuracy. Vial assemblies are contained in plastic holders for convenient adjustment and replacement. No. 524M has quick-turning protractor dial for determining any angle from 0° to 90°.

Torpedo Levels: Ideal for general use and work in tight places. Three vials for plumb, level and 45° miter. Made of precision-milled cast aluminum. Model No. 390 is grooved for pipe, conduit and shaft work. Model No. 390M is magnetized for metal work and easy storage.

Line Level: Locks on cord easily, removes just as easily. Flat base for surface leveling. Accurate, pre-tested vial. Made from high-strength aluminum.

RIDGID Model No.	Length	Body	Vials	Wt. Lbs. Each	Wt. Lbs. 6 to Box	Price Each
Aluminum						
No. 418A	18"	2-9/32" x 1"	4	1-1/2	—	$ 5.71
